

Now available for your seasonal fly control needs...

AERO-MAX

Synergized Insecticide

1% Permethrin with 1% Piperonyl Butoxide (for resistance control).

Enjoy the benefits of this unique flexible fly control solution:

-  Premium oil based formulation adheres and endures better than other fly control treatments.
-  Flexible and cost effective – use as a direct animal spray or premise treatment.
-  Excellent spray pattern at low pressure allows for a variety of sprayer options.
-  Low use rates and convenient spray format means quick applications, lower animal stress normally associated with traditional “pour-on” treatments.
-  Suitable for direct application to Dairy and Beef Cattle, Calves, Sheep, as well as general premise residual insecticidal use.
-  Ready to use – No dilution required.

Aero-Max out performs the competition:

-  Premium oil remains on the hair tips for maximum exposure to flies.
-  Virtually odor free for a more comfortable work environment.
-  Unique formulation is non-staining.
-  Available in sizes to meet your needs – up to tote quantities.
-  Technical support to provide advice on various aspects of pest control.
