

## CLEANER, SAFER, HEALTHIER

At Ecolab, making the world a cleaner, safer place is our business. We are committed to providing our customers with the most effective and efficient cleaning, food safety and infection control programs available. Sustainability is inherent in our products and services. From concentrated formulations to innovative packaging and dispensing methods, our products are designed to help increase safety, lower the use of water and energy, and reduce the chemicals and waste released to the environment. Strengthened by the expertise of our associates and combined with our dedication to social responsibility, these offerings provide value to our customers and the global economy and help foster a more sustainable world.

Less-Cu is available in 15- and 55-gallon containers. Contact your Ecolab dealer to place your order today.

Less-Cu™ foot bath enhancer reduces copper sulfate costs as it helps increase the efficiency of your foot bath solution for hoof cleanliness.

### WHAT LESS-CU DOES

Less-Cu makes copper sulfate more soluble (available) and reduces the introduction of heavy metal to the environment for a clear, effective solution to hoof conditions.

### HOW LESS-CU WORKS

Our industry-best combination allows for reduced copper sulfate usage by the solubilization of the copper which mitigates the chemical binding of copper and manure.

### USAGE RECOMMENDATION

All it takes is one-half gallon of Less-Cu per 50-gallon mix to cut copper sulfate usage in half. Use the same bath replenishment frequency, preferably every 200 to 300 cows, as with a traditional foot bath preventative program.

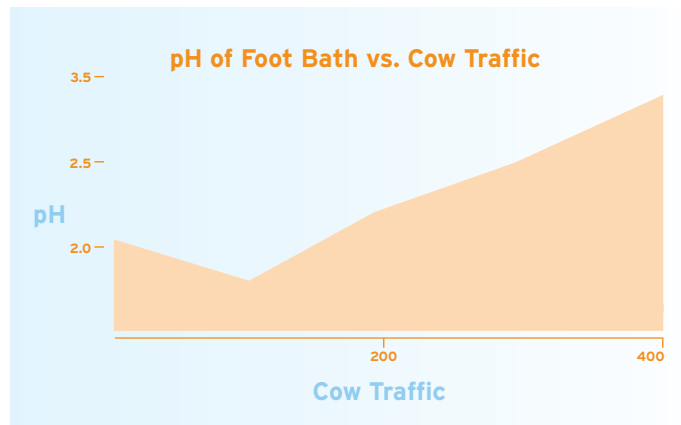

Without Less-Cu

With Less-Cu 1%

Less-Cu keeps manure from binding copper and maximizes solution copper availability.
