

Pur-Oxy™

PRODUCT DESCRIPTION A unique peroxide-based teat dip that provides fast, broad spectrum germicidal activity, both before and after milking.

BENEFITS **Promotes Udder Health and Hygiene**

- ▲ Equally effective against both infectious mastitis organisms and environmental types, such as *E. coli*.

Promotes Quality Assurance

- ▲ User friendly, promotes regular use. Formula contains no dye or pigments to eliminate messy staining problems.
- ▲ Non-irritating formula helps teat conditioning. Gentle on teats and hands

Convenient and Easy to Use

- ▲ Low viscosity formula helps reduce wasteful, excessive consumption.
- ▲ Effective for both pre and post application. One product does it all.
- ▲ Versatile use application - dip or spray.

Pur-Oxy™

PROPERTIES	Form	Liquid	Active Ingredients: lactic acid 1.7% hydrogen peroxide 0.5% Inactive Ingredients: 97.8% (Contains and emollient system.) US Patent No. 5,139,788
	Color	Colorless	
	Odor	Very Mild	
	Spec. Grav. @ 68°F (20°C)	1.017	
	Pounds per gallon	8.47	
	100% Solution pH	3.0	

Formula ingredients contain no phosphorus.

DIRECTIONS FOR USE

IMPORTANT: Do not mix Pur-Oxy with water, any other teat dips, or other products unless specified in product use instructions. If transferred from this container to any other, make sure that the other container is thoroughly pre-cleaned and bears the proper container labeling for Pur-Oxy. If product in dip cup becomes visibly dirty, discard contents and replenish with undiluted product. Do not reuse or return any unused product to the original container.

Before Milking: Wash teats thoroughly just prior to next milking with appropriate udder wash solution or pre-milking teat dip or teat spray to avoid contamination of milk. Teats should then be dried with single-service towels. Use proper procedures for udder washing or pre-dipping.

Directions for Teat Dipping

Pre-Milk Dipping: Fill teat dip cup with Pur-Oxy. Do not dilute. Before each cow is milked, dip each teat full-length into the teat dip cup containing Pur-Oxy. Wipe teats dry after dipping, using single-service towels to avoid contamination of milk.

Post-Milk Dipping: Immediately after each milking, use Pur-Oxy at full-strength. Dip each teat full-length into the teat dip cup containing Pur-Oxy. Allow to air dry. Do not wipe. Always use fresh, full-strength Pur-Oxy. Do not turn cows out in freezing weather until Pur-Oxy is completely dry.

Directions for Teat Spraying

Pre-Milk Spraying: Before each cow is milked, spray entire teat with Pur-Oxy. Wipe teats after spraying using single-service towels to avoid contamination of milk.

Post-Milk Spraying: Immediately after each milking, use Pur-Oxy at full-strength. Spray entire teat with Pur-Oxy. Allow to air dry. Do not wipe. Always use fresh, full-strength Pur-Oxy. Do not turn cows out in freezing weather until Pur-Oxy is completely dry.

Expanded Usage: When freshening cows, begin dipping teats twice daily for about 10 days before calving.

PRECAUTION: Pur-Oxy is not intended to cure or help the healing of chapped or irritated teats. As with any germicide, irritation or sensitization may occur in sensitive animals. In case of teat irritation or chapping, have the condition examined and, if necessary, treated by a veterinarian.

Consult your Ecolab Representative for specific use instructions and recommended dispensing equipment.

For cautionary and first aid information, consult the Material Safety Data Sheet (MSDS) or product label.

ECOLAB SUSTAINABILITY POLICY

We have a commitment to our customers to provide effective programs that help protect the health and safety of their customers and employees. We will sell products or services that maximize performance, limit total environmental impact, and are safe as our customers commonly use them. We will inform our customers of the environmental impacts of our products or services, and of their correct use.
