## Winter Teat Dips that **CONDITION AND KILL!**

All dips have a 5 log - 15 second Kill and Superior Conditioning Packages!

# RECOVER

Winter is Coming. Make sure your herd is protected!

Pete Ripka - Ogilvie MN  
175 Cows - 3X

Pete said, "I would recommend Recover to any producer that has an extreme cold housing situation. It keeps teats in a good, soft condition." He also said, "I will begin using Recover on November 1st, to start the conditioning process and will continue using it throughout the entire winter. We are now buying 55 gallons at time...it works!"

Marianne Peterson - Pine City MN  
400 Cows - 3X

Marianne says, "Recover is a very good, economical post winter dip that brings terrific results, especially when releasing cows in the cold winter elements as we do. Cows do very well on it...teats are well conditioned!" She also said, the dip is much thicker than the traditional post dip and stays on the teat not on the floor."

78% Tri-Blend  
Skin Conditioning Package!  
Germicide:  
1.5% Heptanoic Acid

Easier, Faster and LESS Messy than  
Most salves & creams / No Drips!

# IMPULSE IP-MV

## Triangular Liner - Shell System

# MILK BETTER!

**IMPULSE Testimonials!**

**Milking over 1.5M Cows in US!**

**Kinnamon Ridge Dairy, LLC.**  
Jerry & Linda White  
Reedsburg, WI  
630 Cows - 3X - Dbl. 16

**Speltz Dairy**  
John Speltz  
Oak Ridge, MN  
702 Cows - 3X - Dbl. 12

**Schumacher Farms**  
Dale, Erin, Jesse & Dillan  
Eyota, MN  
90 cows - 2X - Tie Stall

Jerry said, "We immediately noticed a difference. We had tons of slipping and squawking previously, now it's next to none. He went on to say, "We were on our Milkers all the time to go back and reattach units. Reattaches NOW have virtually been eliminated. We also have less dancing at the point of take-off. Our teat ends are great now! I have recommended the IMPULSE IP-MV to other producers...It's a good product!"

John said, "I noticed a difference right away. I did not know teat ends could look that good. Within a second change (one month), they were cleaned up! I did not think they would get to where they are now that quick. I had lots of stepping and dancing with my heifers with the other liners. It's a non-issue now! Going into winter we've never had good teat ends. I'm really happy this year; They are the best they've ever been!"

Jesse said, "We noticed a difference immediately. We had one of our high producing cows that took 15-19 minutes to milk-out. First night with the IMPULSE she dropped to 10 minutes. Overall we noticed faster milk-outs! The units came right off after they were done milking. No pulling at all. We've been on the IMPULSE for 6 months and teat ends are the best they've ever been. Our SCC has dropped. We are sold on the IMPULSE!"

## UDDER COMFORT
