IMPULSE

**"The Biggest Advance in the
Milking Process in a Generation"**

"No Squawking or Slips!"

Schumacher Farms Inc. located in Elgin, MN milks 750 Cows 3X in a Double 12 parlor. Before milking with the IMPULSE IP-MV Triangular Liner—Shell System, Bob Hartz, Herdsman for Schumacher Farms said, "Teat ends were poor, cows were restless, old liners were squawking and cows were not milking out very efficiently." Mark Swenson and T.J. Stettler of S&S Dairy Systems out of St. Charles MN analyzed the system and recommended the IMPULSE IP-MV Triangular Liner—Shell System. T.J. said, "The Milk to Rest ratio is so much better. As a result we can milk out the cows faster and get much better teat massage!" Bob was extremely happy with the expertise of S&S Dairy Systems as he noticed a difference in the parlor immediately!

Bob Hartz...
**"We saved 90 minutes
per day!"**

Bob said, "We noticed an immediate difference... Cows are much more relaxed and comfortable. Because units were not on as long we have No Purple Teats and overall Better Teat Ends. The parlor is much more quiet...No Squawking or Slips. Because cows are milking out faster and units are not on as long we saved 90 minutes per day!"

Bob also said, "Teats are Dry....No milk what-so-ever is left on the teat after the unit comes off. He also said, "The mouth-piece vent placement is excellent as it gets cleaned during the wash."

When asked if he would recommend the IMPULSE System to other dairies Bob responded, Absolutely ... I wish we would have had them sooner!"

"Teats Are Dry!"
"Better Teat Ends!"
