

**Milking over
1.5M Cows
in US!**

NEW from the Leader in Dairy Liner Technology **IMPULSE**

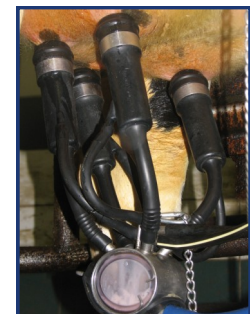

**FREE
System
Analysis**

Kingdom Haven Farm Inc., located in Edgar WI, was established in 1886. It is owned and operated by Kevin and June King, Mike and Linda King, their sons Nathan, Patrick and Scott King and Linda and June's brother Kenneth Paul. They are currently milking 600 cows 3x in a Double Six AutoFlow parlor, with current production levels over 90lbs per cow in the bulk tank. Their SCC is under 175,000 fitting in well with their constant effort toward maximizing production quality and efficiency.

Nathan King and Dick Joanis are very pleased with the results of the IMPULSE IP-3 Liner and Shell!

Before using Milk-Rite's IMPULSE IP-3 liner and shell system Nathan King, Milk Quality Specialist at Kingdom Haven said, "We had poor teat ends. They were pulled out. Inflations were squawking and cows were not milking out cleanly and efficiently." To solve these problems, Dick Joanis of Bob's Dairy Supply analyzed the system and the situation and recommended the use of the IMPULSE liner system. Dick says, "We are now able to get a much better Milk to Rest ratio. The other liners used to much time getting into milk and rest phases. Now we can milk faster and get better teat massage."

"No Squawking or Slips!"

After the change Nathan noticed the difference right away. "We noticed immediately the difference. No squawking, no slips and teat ends were much better. Milking time was significantly reduced." "In fact we have saved 30-45 minutes per milking." When asked if he would recommend the Impulse system to other dairies Nathan responded, "Definitely, we are very happy with them and will be using them in our new facility when it is completed late this year."
