

# LDS FLY GUARD

**Universal Arm  
Right or Left Position**

## KEY FEATURES :

1. Easy to install in cow traffic lane.
2. Easy to adjust for cow height — minimize skipping of cows that are close together.
3. Adjustable spray time—minimize product waste.
4. One arm is adjustable for either a Left Hand or a Right Hand installation.
5. Assembly is light weight, easy to clean, and durable.
6. Applications that do not have compressed air available can be purchased with an electric pump.
7. Ordering Options are:
  - Controller:** Programmable 24VDC (or) always “ON” 120 VAC.
  - Pump:** Air (or) Electric
  - Arm:** Right Hand (or) Left Hand (or) Both.

## **AERO-MAX Synergized Insecticide:** **1% Permethrin with 1% Piperonyl Butoxide (for resistance control).**

- \* Premium oil based formulation adheres and endures better than other fly control treatments.
- \*Flexible and cost effective.
- \*Excellent spray pattern at low pressure.
- \*Low use rates and convenient spray format means quick applications.
- \*Suitable for direct application to Dairy animals, as well as general premise residual insecticidal use.
- \*Ready to use! No Dilution Required!
