

RJB Side Dipper™

10-30000

The new RJB Side Dipper™ offers a unique way to dip teats.

The cup and bottle become a natural extension of your hand when gripping the soft squeeze bottle. A gentle pressure on the bottle dispenses a small amount of teat dip (about 4 cc's); all that you need because of the patented design of the cup.

Bring the cup up under the udder and over the teat. Push the cup all the way to the base of the udder. When the teat is inserted into the cup, it will displace the dip and cover the entire teat from the tip to the base.

The Splash Guard / Teat Guide (the clear ring) keeps the dip from spilling when the cup is rapidly moved from teat to teat.

The new RJB Side Dipper will generally reduce the amount of dip you are currently using by 25 to 75% (Depending on your present teat dip application method).

The RJB Side Dipper is made from the latest technology in engineered plastics to give you a durable and quality teat dip cup that will last many seasons.
