

## Code Green™

### PRODUCT DESCRIPTION

Code Green™ is a unique fatty acid based teat dip that provides protection against mastitis-causing pathogens. Code Green also contains a blend of emollients for superior teat conditioning.

### BENEFITS

#### **Promotes Udder Health and Hygiene**

- ▲ Contains 0.7% heptanoic acid to provide superior efficacy without the harsh drying effect encountered with iodophor-based teat dips.
- ▲ Passes AOAC sanitizer test with a greater than 99.999% (> 5 log) reduction with only 15 seconds contact time, even in the presence of a 10 % milk challenge.
- ▲ Equally effective against both contagious and environmental mastitis organisms, such as *Escherichia coli*, *Streptococcus agalactiae*, *Streptococcus uberis* and *Staphylococcus aureus*.

#### **Gentle - Versatile Formulation**

- ▲ All-season formula provides year-round protection and teat conditioning – contains an emollient system including glycerin and lanolin.
- ▲ Contains a teat marking system to provide visual proof of coverage.

	Pounds per gallon.....	8.63 (3.91 kg)		

System contains a blend of emollients. Phosphorous free

## DIRECTIONS FOR USE

**IMPORTANT:** Do not mix Code Green with water, any other teat dips, or other products unless specified in product use instructions. If transferred from this container to any other, make sure that the other container is thoroughly pre-cleaned and bears the proper container labeling for Code Green. If product in dip cup becomes visibly dirty, discard contents and replenish with undiluted product. Do not reuse or return any unused product to the original container.

**Before Milking:** Wash teats thoroughly just prior to next milking with appropriate udder wash solution or pre-milking teat dip or teat spray to avoid contamination of milk. Teats should then be dried with single-service towels. Use proper procedures for udder washing or pre-dipping.

**Directions for Teat Dipping**

**Pre-Milk Dipping:** Fill teat dip cup with Code Green. Do not dilute. Before each cow is milked, dip each teat full-length into the teat dip cup containing Code Green. Wipe teats dry after dipping, using single-service towels to avoid contamination of milk.

**Post-Milk Dipping:** Immediately after each milking, use Code Green at full-strength. Dip each teat full-length into the teat dip cup containing Code Green. Allow to air dry. Do not wipe. Always use fresh, full-strength Code Green. Do not turn cows out in freezing weather until Code Green is completely dry.

**Directions for Teat Spraying**

**Pre-Milk Spraying:** Before each cow is milked, spray entire teat with Code Green. Wipe teats after spraying using single-service towels to avoid contamination of milk.

**Post-Milk Spraying:** Immediately after each milking, use Code Green at full-strength. Spray entire teat with Code Green. Allow to air dry. Do not wipe. Always use fresh, full-strength Code Green. Do not turn cows out in freezing weather until Code Green is completely dry.

**Expanded Usage:** When freshening cows, begin dipping teats twice daily for about 10 days before calving.

**PRECAUTION:** Code Green is not intended to cure or help the healing of chapped or irritated teats. As with any germicide, irritation or sensitization may occur in sensitive animals. In case of teat irritation or chapping, have the condition examined and, if necessary, treated by a veterinarian.

Consult your MEDA Representative for specific use instructions and recommended dispensing equipment.

For cautionary and first aid information, consult the Material Safety Data Sheet (MSDS) or product label.
