Liquid Lustersuds®

Concentrated, liquid, natural soap

Liquid Lustersuds is a natural soap-based product that lubricates cotton fibers so linen has a nice soft touch. **Liquid Lustersuds** is ideal for diaper, healthcare, hospitality, and shirt laundries.

Attacks stains, improves whiteness

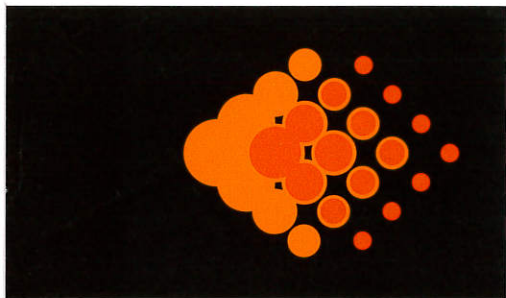

In addition to natural soaps, **Liquid Lustersuds** contains anionic and nonionic surfactants for rapid penetration of soils and stains on synthetic fibers. The concentrated formula improves fabric whiteness by preventing soil redeposition.

Versatile, safe for all fabrics and colors

Liquid Lustersuds is safe on all washable fabrics, both colored and white—ideal for cotton. It is compatible with all liquid or dry builders and bleaches and is effective over a broad temperature range.

Convenience, control, and safety

Liquid Lustersuds has a low viscosity for easy pumping. It is dispensed directly from its shipping container into the wash wheel through the Laundry Brain®. Automatic dispensing eliminates messy powders and mixing vats; employees never come in contact with concentrated chemicals. Consistent, quality results are ensured.

Concentrated, soap-based product

Use Suggestions

For effective laundering, use **Liquid Lustersuds** in a properly designed wash formula. The medium titer soap in **Liquid Lustersuds** is effective over a broad range of temperatures (120-160°F.). Recommended for use in softened or natural water, up to four grains per gallon hardness.

Liquid Lustersuds is designed for use with Textile Care's exclusively engineered Laundry Brain® automatic injection system — micro-processor-controlled, programmable logic for six or more liquid products. Reliable, accurate peristaltic pumps can be interchanged to deliver liquids efficiently into all size washers. The Laundry Brain's unique Consumption & Production Monitor System records product usage by wash classification; an excellent management information tool. Reliable, accurate, and precise product control results in consistent quality without waste or overuse. Labor-saving, automatic injection promotes economy and safety.

Contact your Textile Care Laundry Efficiency Specialist for specific use recommendations which meet local operating conditions.

Compliance

Biodegradable	Yes
Phosphate Containing	No

Safety Information

Liquid Lustersuds contains surfactants and can cause irritation to eyes and skin. If swallowed, can cause stomach distress, nausea, or irritation. Users should observe caution on package label. See Material Safety Data Sheet (MSDS) for complete precautionary and first aid information.
