

Masticare Film™

PRODUCT DESCRIPTION Masticare Film™ is a gentle post-milking barrier teat dip that features a blend of emollients for superior teat conditioning and a unique LSA based germicidal system provides fast, broad spectrum germicidal activity.

BENEFITS Promotes Quality Assurance

- ▲ Helps promote udder health and hygiene
- ▲ Gentle to skin, delivering 23% emollients, including propylene glycol, glycerin, lanolin, and aloe
- ▲ No-drip formulation contains a brown marking system that helps confirm proper application and leaves a long-lasting film
- ▲ Equally effective against both contagious and environmental mastitis organisms, such as *Escherichia Coli*, *Streptococcus agalactiae*, *Streptococcus uberis*, and *Staphylococcus aureus*

Non-oxidative germicidal technology contains salicylic acid and lactic acid

Gentle, versatile formulation

- ▲ Gentle to skin, delivering 23% emollients, including propylene glycol, glycerin, lanolin, and aloe
- ▲ Easier to remove than latex barrier type dips, reducing prepping time

Environmental Implications

- ▲ Ingredients are Generally Recognized as Safe (GRAS) for food production. Does not contain nonylphenol ethoxylates (NPE)

Masticare Film™

PROPERTIES	Form	liquid	Active Ingredients: Lactic acid 2.2% Salicylic acid 0.1% Skin Conditioning system: (contains propylene glycol, glycerin, lanolin, aloe) 23.0% Inert Ingredients: 74.7% Total: 100.0%
	Color	dark brown	
	Odor	peppermint	
	Spec. Grav. @ 68°F (20°C)	1.054	
	Pounds per gallon.....	8.78 (3.98 kg)	
	100% solution pH	2.5-3.0	

Formula ingredients contain no phosphorus.

DIRECTIONS FOR USE

IMPORTANT: Do not further dilute with water or mix with any other teat dips. If product in dip cup becomes visibly dirty, discard contents and replenish with fresh product. Do not reuse or return any unused product to the original container.

Pre-Milking/Prepping: Using proper cleaning procedures, wash teats with appropriate udder wash solution or pre-dip/spray each teat prior to milking. Teats should then be dried with single-service towels.

Post-Milk Dipping: Using fresh Masticare Film, dip each teat full-length into the teat dip cup. Do not wipe. Allow to air dry. Do not turn cows out in freezing weather until the product is completely dry.

Expanded Usage: When freshening cows, begin dipping teats twice daily for about 10 days before calving.

PRECAUTION: Masticare Film is not intended to cure or help the healing of chapped or irritated teats. As with any germicide, irritation or sensitization may occur in sensitive animals. In case of teat irritation or chapping, have the condition examined and, if necessary, treated by a veterinarian.

Consult your A&L Laboratories Representative for specific use instructions and recommended dispensing equipment.

For cautionary and first aid information, consult the Safety Data Sheet (SDS) or product label.

STATEMENT OF ASSURANCE

This product is effective under the intended conditions of use as outlined on the product label.
