

Monarch[®]

Mon-O-Dine[®]

PRODUCT DESCRIPTION

Monarch[®] Mon-O-Dine[®] is a blend of iodine, wetting agent and an acid, providing excellent detergency to assist in udder cleaning.

BENEFITS

Helps Insure High Quality Milk

- Helps reduce sediment in milk.
- Continues to work, even in the presence of organic contamination.
- Contains its own color indicator of concentration.

Gentle

- When used with warm water and proper massage, will help stimulate milk letdown.
- Gentle to the skin when used at proper use dilution.

Mon-O-Dine®

PROPERTIES

Form	liquid	Specific gravity	1.105
Color	brown	% titratable iodine	1.47%
Odor	iodine	Pounds per gallon	9.21 (4.18 Kg)
Foam	moderate	Use dilution	1 oz./5 gal
Wetting Ability	excellent	(provides 25 ppm iodine)	

TABLE OF DILUTIONS

One (1) ounce *Monarch Mon-O-Dine* to 5 gallons (1.6 mL/L) provides 25 ppm titratable iodine.

Formula contains not more than 4.2% of phosphorus, 0.3 grams per gal. of average recommended use concentration.

USE

1. Prepare the udder washing solution in plastic pail, using 1 ounce *Monarch Mon-O-Dine* to 5 U.S. gallons (1.6 mL/L) warm water, 100°-115°F (38°-46°C), or use a sprayer.
2. Approximately one minute before application of the machine, wash and massage the teats and udder with this solution, using a paper towel which has been soaked in the solution.
3. After gentle washing and massage of the udder, press the excess solution from the towel and use the reverse side to dry the teats and udder.
4. Discard the used towel and use a clean towel for each cow.
5. Check udder with a strip cup or screening paddle before applying the machine.

Use only at recommended use dilution.

For cautionary and first aid information, consult the Material Safety Data Sheet (MSDS) or product label.
