
TEAT GUARD™ "50"

Sanitizing Teat Dip

PRODUCT DESCRIPTION

TEAT GUARD "50" is a 5,000 ppm iodophor teat dip that contains a wetting agent, film former and emollient to help ensure adequate coverage and maximum germicidal activity.

BENEFITS

Promotes Udder Health and Hygiene

- Contains .5% titratable iodine, providing visual proof of coverage from the slightly amber-colored film on the teat.
- Equally effective against both infectious mastitis organisms and environmental types, such as E. coli.
- Passes AOAC Germicidal and Detergent Sanitizer Test with a greater than 99.999% reduction of Staph aureus and E. coli organisms
- Non-irritating formula helps teat conditioning; gentle on teats and hands.
- Film former and wetting agent allows product to cling to the teat

Versatile - Cost Effectiveness

- Low viscosity formula reduces wasteful, excessive consumption.
- Effective for both pre and post milking application - one product does it all.

TEAT GUARD™ "50"

Sanitizing Teat Dip

PROPERTIES

Form liquid Specific gravity 1.020
Color dark brown Pounds per gallon 8.50
Odor mild
Active Ingredient:
 Iodine 0.5%
Contains nonylphenoxypolyethoxyethanol-iodine complex, providing
5,000 ppm min. titratable iodine.
(CONTAINS AN EMOLLIENT SYSTEM)

Available in 5 gallon (18.9 l) pail, and 15 (56.8 l) and 55 gallon
(208.2 l) drums.

For cautionary and first aid information, consult the Material Safety
Data Sheet (MSDS) or product label.

TO USE

DIRECTIONS FOR TEAT DIPPING

PRE-MILKING: Fill teat dip cup with TEAT GUARD "50". Do not dilute. Before each cow is milked, dip the teats as far as possible into the teat dip cup containing TEAT GUARD "50". Wipe teats dry after dipping, using single-service towels to avoid contamination of milk.

Udders and teats which are heavily soiled should be washed before using a pre-milking teat dip. Teats should then be dried with a single-service towel and dipped in TEAT GUARD "50", wiping the teats dry before milking.

POST MILKING:

Immediately after milking, use TEAT GUARD "50" at full strength. Submerge entire teat in TEAT GUARD "50" solution. Allow to air dry. Do not wipe. Always use fresh, full strength TEAT GUARD "50". If product in dip cup becomes visibly dirty, discard contents and replenish with undiluted product. Do not reuse or return used product to the original container. Do not turn cows out in freezing weather until TEAT GUARD "50" is completely dry.

Use proper procedures for udder washing or pre-milking teat dipping just prior to next milking to avoid contamination of milk.

IMPORTANT: Do not mix TEAT GUARD "50" with any other teat spray, dip or other products. If transferred from this container to any other, make sure that other container is thoroughly pre-cleaned and bears the proper container labeling for TEAT GUARD "50".

NOTE: TEAT GUARD "50" is not intended to cure or help the healing of chapped or irritated teats. In case of teat irritation or chapping, have the condition examined and, if necessary, treated by a veterinarian.
