

TurboFlex-D™ Detergent

TurboFlex-D is part of Textile Care's complete line of premium, ultraconcentrated Turbo products, specially formulated to maximize speed, efficiency and performance. Designed to lower operating costs across the board, Turbo products save you time, energy and water – while producing superior results.

USE SUGGESTIONS

TurboFlex-D detergent has been formulated to work synergistically with *TurboFlex-C* conditioner on grease, oil and particulate soils. When washing at lower temperatures (120°F -140°F), use with *TurboMax*, silicated builder to maximize performance in the washwheel. Your Textile Care Laundry Efficiency Specialist will design a wash formula that meets the needs of your soil classifications, fabrics, water types, and local operating conditions.

TurboFlex-D detergent is designed for use with Textile Care's exclusively engineered automatic injection systems.

COMPLIANCE

TurboFlex-D is phosphate-free.

SAFETY INFORMATION

If swallowed can cause irritation, nausea and stomach distress. Users should observe specified cautions on package label. See Material Safety Data Sheet (MSDS) for complete precautionary and first aid information.

FLEX-D

Superior Performance Industrial Detergent

Unprecedented petroleum and grease removal.

TurboFlex-D is a low alkaline detergent with a unique blend of amphoteric and nonionic surfactants. When used with *TurboFlex-C* conditioner, it quickly penetrates and removes petroleum oils, fats and greases from fabrics.

The ultimate in flexibility and productivity.

When combining *TurboFlex-D* detergent with *TurboMax* builder, you can wash at a cost-saving 120°F, or use alone at traditional temperatures. Either way, you will realize up to a 25% productivity increase over conventional systems and 15% reduced water use.

No thermal shock for reduced wrinkling and finishing.

When using the low temperature *TurboFlex* option on polyester/cotton blends, garments show fewer wrinkles than at higher temperatures. That saves time and labor in finishing.

Pure performance on all washable fabrics.

The special blend of ingredients in *TurboFlex-D* detergent is safe to use on all types of fabrics and colors—from 100% cotton to 100% polyester. Soil suspending action prevents graying or yellowing of linen, leaving whites whiter and colors brighter.
