

## PRE and POST DIP SEASONAL/SITUATIONAL ROTATION RECOMMENDATION

	Jan	Feb	Mar	April	May	June	July	Aug	Sept	Oct	Nov	Dec
Pre Dip	Valiant Pre				Express I						Valiant Pre	
Post Dip	Express Prime				Express Blue				Express Prime			

*Please be aware that this is an example program and may not be recommended for all dairy scenarios. Each udder care program should be crafted based on individual weather climate, environmental conditions, management practices, etc.*

**Pre Dip** Valiant Pre in the wettest or most challenging months. Made to get dirty teats clean. Made up of surfactants that help cleaning process. Then when cows are relatively clean use a more economical product like the concentrates. (Express I)

**Post Dip** Use Express Prime going into and coming out of Winter-Blend of 9 different conditioners  
 Use Valiant Pre Post in the coldest months of Winter-Most challenging months for Teat Health  
 Have Artec for use on the very coldest days-Winter Dip with 78% conditioners  
 Use Express Blue in the summer months when not as many conditioners are needed
