EXSPOR

Chlorine-Dioxide Final Rinse Disinfectant / Sterilant

Complete destruction of ALL forms of life including bacterial spores as well as bacteria viruses and fungi!

ARE YOUR CALVES HEALTHY? SCOURS A PROBLEM?

Cleaning Calf and Heifer feeding equipment is a vital part of every dairy. Without proper cleaning and sanitation of feeding equipment, disease and illness can quickly spread between calves. To prevent disease, illness and ultimately death we suggest using EXSPOR, a chlorine dioxide disinfectant and sterilant in your cleaning and sanitation program with calves. Chlorine Dioxide is extremely effective and kills bacteria fast. This product is also used in the medical field. Below is how and where EXSPOR can be used. It will help your dairy maintain healthy calves.

How to use EXSPOR:

4-Step Process Bottle, Nipple & Bucket Washing:

- Rinse with warm water – about (90F).
- Wash with hot water (145F) and a chlorinated manual detergent.
 - ◆ Scrub with appropriately sized brushes.
 - ◆ Use detergent according to manufacturer's recommendation.
 - ◆ Removes butterfat and milk protein films.
- Rinse with warm water about (90F).
- Soak with EXSPOR (Chlorine Dioxide 200-250ppm).
 - ◆ Spray or Foam.
 - ◆ See Test Strips.
 - ◆ Thoroughly kills all bacteria that is present.
 - ◆ Control of salmonella and cryptosporidium.
- **Use EXSPOR on Hutches, Walls & Parlors as a Final Step when cleaning.**
 - ◆ No Need to Rinse ---- Just spray or foam.

Where to use EXSPOR:

- Calf Hutches
- Calf Bottles
- Calf Nipples
- Calf Buckets
- Parlor/Milk Room Walls
- Drains

**EXSPOR can be
Foamed or Sprayed**
