IPC400

THE NEXT LEVEL IN MILKING CLAW TECHNOLOGY

**LARGER
CAPACITY
400CC BOWL
FOR HIGH
PRODUCING
COWS**

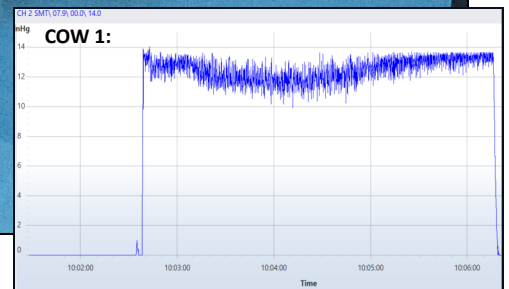

**THE IPC400
PROVIDES A MORE
STABLE VACUUM,
AND BETTER MILK
EVACUATION,
RESULTING IN A
BETTER MILKING
EVENT**

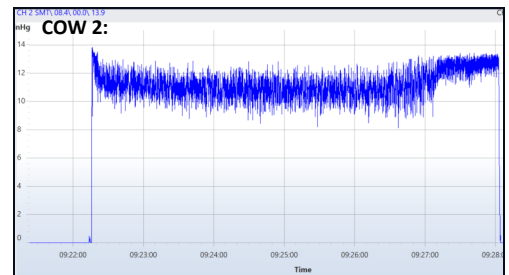

1400 Cow Case Study:

IPC-400 (bottom unload) vs. Barrel Claw (Top Unload):

Results: Less vacuum fluctuation with IPC-400. The barrel claw had .8" MORE fluctuation (2.7" vs. 1.9"). The IPC-400 allowed for lower system vacuum and still maintained the proper teat end vacuum. We also saw a faster milk-out with the IPC-400... REDUCING unit on-time by up to :17 seconds over a 7 day average! That is Significant!

IPC-400 CLAW

Barrel Claw

mi milkrite | InterPuls
Improving every farm we touch

The Claws tough PPSU material makes it **durable and resilient** to all the challenges of the modern dairy parlor.

The **lightweight and ergonomic** nature of the IPC400 makes it comfortable and easy to use.

Evacuate milk faster thanks to the **larger capacity** 400cc internal bowl.

The IPC400s **larger outlet nipple** (20.5mm ID) also aids milk evacuation

Stable vacuum greatly reduces slips and squawks creating a **stress free environment** for the milker and the cow.

Available for purchase or through **Cluster Exchange Service.**

Optimize the milking event by pairing the IPC400 claw with Impulse Air liners.

FOR EVEN BETTER RESULTS WHY NOT PAIR WITH OUR IMPULSE AIR SHELL AND LINER, GIVING YOU AN INCREASED MILKING PERFORMANCE AND IMPROVED TEAT HEALTH!
