

The IPS-8 NC liner has completed 8,000 milkings with no issues. We cannot say that about any other liner we have used. It's a one-piece liner made of a simple design, it cleans well and stays clean throughout the milking process

ERIC VAN NURDEN

Van Nurden Farm LLC

Rice – Minnesota

IPS-8 NC extraordinary design and new material provide:

- Durability and extended life, means you save time as you change liners less often
- Cow's comfort and speed of milking: IPS-8 NC does not compromise
- Better teat health and higher quality milk, thanks to the vented mouthpiece and triangular design
- Extended life, means less refuse impacting the environment

IPS-8 NC: ✓ Fast ✓ Clean ✓ Safe

NEW IPS-8 NC, the amazing
silicone liner by *mi*
FAST, CLEAN and SAFE

*IPS-8 NC helped me to reduce both
Mastitis cases and SCC. I am very
pleased with this liner!*

MARK FELLWOCK
Owner Of Fellwock Dairy
Monett – Missouri

Mark Fellwock, now has piece of mind, thanks to the new IPS-8 NC liner, which is providing faster milking and better teat health to the family herd. It really marks another milestone in the *mi* technology offering for farmers.
